

WIRE MESH BELTS (LADDER BELTS)

Wire mesh belts are the ideal hygienic, food safe metal detectable conveyor belts for transportation of medium to light goods, the large open areas available are the most efficient conveyor belts for many applications and a variety of processes.

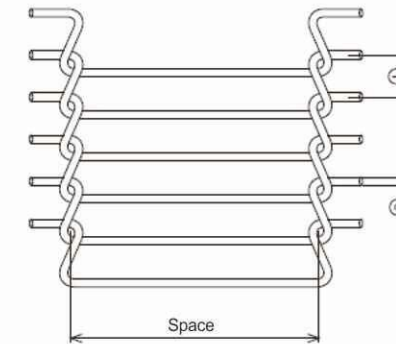

Wire mesh belts in compliance with the latest food safety requirements for food processing equipment such as FDA, GMP and 1935/2004/EC. This ensures our customers get a belt that is fit for use in the most demanding food processing applications.

Wire mesh belts are ideal for light transfers and are suitable for a wide range of active food contact applications such as:
Drying - Cooling - Heating - Draining - Coating - Glazing - Enrobing

PRODUCT DISPLAY

WIRE MESH BELTS (LADDER BELTS)

- ① Pitch
- ② Wire Dia
- ③ Number of Spans
- ④ Edge Shape

SPECIFICATION

Material	SUS304,SUS316
Pitch(mm)	4.3~20
Wire Diameter(mm)	1.0,1.2,1.4,1.5,1.6,1.8,2.0,2.3,3.0
Belt Width Range(mm)	200~3600
Edge Finish	Clench
Length	Customized

Customized specification can be made as per request

FEATURES OF LADDER BELT & CROSS BAR BELT

- Available in straight running and 90° and 180° Radius
- Large open mesh area enables total efficiency for heating or cooling
- Easy clean, hygienic design, no contamination hot spots, reduced cleansing process.
- High quality manufacturing standards ensures long life span
- Positive drive, no slip
- Available in a wide variety of materials; the standard is 1.4301 (304) stainless steel. Other materials available include: 1.4404 (316L)

APPLICATION OF THE LADDER BELT / CROSS ROD BELT

- Cooking • Heating • Cooling • Coating • Freezing • Enrobing • Frying • Battering • Breeding • Drying
- Draining • Glazing
